5 reasons to test for HIV (again)

Gay Health: 5 reasons to test for HIV

Video of Gay Health: 5 reasons to test for HIV

In our second video with Hornet, we talk testing, giving you 5 reasons to test for HIV again. We run through some of the things you might not know about HIV testing and why it’s important to do it regularly. You probably get it already that testing for HIV is the only way to know your status, but did you know that in many places you can now test for HIV in the privacy of your own home?

Check out the other videos in the series and stay tuned for more. Explore our ‘Gay health’ hub, where we bring together all the most important sexual health resources for gay and bisexual men.

What can you do?

Spread the word about the video!

We want as many gay men as possible to have the knowledge and freedom to make choices about their own sexual health as possible:

- Watch and share our videos
- Read and share our *new* ‘Gay health, sex and HIV’ hub
- Watch out for more in the series!

Suggested Tweets

Already tested for #HIV? Here are 5 reasons to test again. @Avert_org have teamed up with @Hornet, to provide gay men with a guide to everything they need to know about HIV testing in a brand new video: https://youtu.be/sDP0HFG6x2A

DYK gay and bisexual men are recommended to test for #HIV every 3-6 months? @Avert_org have teamed up with @Hornet, to provide men with all you need to know about regular HIV testing in a brand new video: https://youtu.be/sDP0HFG6x2A

HELP US HELP OTHERS

Avert.org is helping to prevent the spread of HIV and improve sexual health by giving people trusted, up-to-date information.
We provide all this for FREE, but it takes time and money to keep Avert.org going.

Can you support us and protect our future?

Every contribution helps, no matter how small.
